Art Unit: 1714

The election received 18 July 2006 has been made of record. Claims 1-18 are pending. Claims 1-13 are being examined.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '426.

EP '426 discloses composite particles comprising an inorganic core, a gluing agent coating and an outer organic pigment layer. These particles are taught as meeting the size limitations and chemical makeup of the instant claims. While refractive indices are not explicitly taught, values such as claimed instantly are seen as inherent to the composites of the reference.
